

**An NSF Alliance between Historically Black Universities and Research Universities for Collaborative Education and Research in Computing Disciplines**

This alliance is an ambitious 9-institution collaboration that will result in significant, sustained increase in enrollment and graduation of African Americans in graduate level computing degree programs and entry into research-oriented careers. The program, based on the combined experience of committed partners, will strengthen undergraduate computing programs, create and maintain research experiences for undergraduates, and support ongoing research and teaching partnerships among faculty members.
